COURSE DESCRIPTION

Economic Development Finance focuses on the tools and programs available to the economic development practitioner to address the implementation and execution of economic development projects. More specifically, this course is structured as a seminar to identify, discuss, and analyze the program, processes and systems through which economic development finance is implemented with an emphasis on urban America.

This course combines core elements of economic development finance that can be applied to a range of projects to include traditional industrial or business development, and mixed-use and housing developments, all of which are central components of a successful economic development strategy. Having a working knowledge of economic development finance tools has become critical for public policy officials, economic development practitioners, non-profit organizations, private developers, and corporate financial officers to name a few.

COURSE OBJECTIVES

• To enhance an understanding of the context in which economic development finance occurs;
• To gain an understanding of the common tools of economic development finance used in economic development projects; and to apply techniques to evaluate and structure financing plans for firms and real estate projects.
• To gain an understanding in the process of packaging and delivering incentives and tools (specifically how to articulate the value).

COURSE MATERIALS/REQUIRED READINGS

Additional reading assignments will be assigned throughout the course and posted on Blackboard to emailed directly to student.
COURSE REQUIREMENTS

All students are expected to complete the following assignments:

1. Read the required readings and constructively participate in class discussions (highly encouraged).
2. Complete a take-home midterm examination due on March 9th by 10 pm.
3. Complete the Case Study assignments at the end of Chapters 4, 5, 6, 7 and 8 in the text. Assignments will be handed in at the end of each class.
4. Complete an economic development Program Analysis Paper. Each student will complete an economic development finance paper (4-5 pages excluding exhibits and financial statements) that discusses the pros and cons of a specific economic development finance assistance program. You may select from the various existing tools or programs discussed in class or propose a new program. Each student will be required to write a detailed paper on its use and make the case as to why it is an effective economic development tool including a financial spreadsheet. You will be required to show a hypothetical example of how the tool would be implemented and the proposed benefits and costs of the program. Each student will be assigned an ED tool or program on or before February 23rd. The proposal should briefly identify the topic in detail you intend to pursue and a brief description of the example. This paper will be due March 30th.
5. Complete an economic development Project Presentation and Paper. Each of you will be responsible for providing a 12-15 minute presentation on a proposed economic development finance project to a particular urban development case study of your choice, due at end of semester. The presentation should focus on the viability of financing the project based on major concepts, theories and perspectives discussed in class (economic, moral/ethical, political, and others). Your presentation should be from the perspective of a local economic development official proposing the recommended public financing approach (in other words, why this is the best option). Each student will hand in a 10-12 page paper on the day of your presentation summarizing your presentation including a financial spreadsheet. All students will also be responsible for critiquing and raising constructive questions of another student’s presentation. You are expected to utilize library research, Internet-based searches, professional associations, and expert interviews as sources of information on your selected topic. Your paper should conform to APA style guidelines for citations and bibliography. Your paper should be your own work and should follow academic standards for quoting and referencing the work of others. Your paper should be written in a clear, concise, jargon-free format. Presentations will be held on May 4th. The final paper is due on or before May 11th by 10 pm.

GRADING
Grading will be based on each student’s demonstration of their knowledge of the course material and capacity to apply via:
20% Class Discussion and Participation
20% Mid-Term on Concepts & Tools
20% Text Case Study Assignments
20% Program Analysis Paper
20% Final Economic Development Finance Project Presentation & Paper
University/College Policies

University Deadlines

- For the current semester, the deadline for dropping a course is January 27, 2017.
- The last day to withdraw from the course is March 31, 2017.
- The final examination week is May 6-12, 2017.

Student Grading

CSU uses the following letter grades with plusses and minuses. In the Levin College the letter grades follow this numeric scale:

A = 94-100%
A- = 90-93
B+ = 87-89
B = 83-86
B- = 80-82
C+ = 77-79 (there is no C+ grade for graduate students; C = 70-79 for grad students)
C = 70-76 for undergraduates, 70-79 for grad students
D = 60-69 (there is no D for graduate students)
F = 59 and below for undergraduates, 69 and below for graduate students

Grades of “I” and “X”

X - The grade of "X" can be assigned by the instructor when an attending/participating student has stopped attending/participating without notification and has not completed all assignments for reasons that cannot be determined by the end of the grading period. An "X" automatically becomes an F if not resolved by the last day of instruction of the following semester. An “X” also will be assigned by the University Registrar when no grade is submitted by an instructor.

I - Incomplete. The "I" grade is given when the work in a course has been generally passing, but when some specifically required task has not been completed through no fault of the student.

An "I" grade can be assigned by the instructor when all three of the following conditions are met:

1. Student is regularly attending/participating in the class and has the potential to pass the course;
2. Student has not completed all assignments and has stopped attending/participating for reasons deemed justified by the instructor; and
3. Student has notified the instructor prior to the end of the grading period.
Students with Special Needs

Educational access is the provision of classroom accommodations, auxiliary aids and services to ensure equal educational opportunities for all students regardless of their disability. Any student who feels he or she may need an accommodation based on the impact of a disability should contact the Office of Disability Services at (216)687-2015. The Office is located in MC 147. Accommodations need to be requested in advance and will not be granted retroactively. Students should notify the instructor as soon as possible if they have been granted an accommodation through the Office of Disability Services.

Writing Assistance

Students with difficulty writing may contact the Writing Center located in Rhodes Tower 124 for assistance. Students should use the American Psychological Association (APA) format for citations and reference pages.

Plagiarism

Plagiarism is stealing and/or using the ideas or writings of another in a paper or report and claiming them as one’s own. This includes but is not limited to the use, by paraphrase or direct quotation, of the work of another person without full and clear acknowledgment.

The penalties for plagiarism are found in full in the Student Handbook (Office of Student Life) under Academic Regulations (Policy on Academic Misconduct) at the following link:
