Wastewater Treatment Facilities

MCES Meters

MCES Lift Stations

Liquid Waste Hauler Sites

MCES Wastewater Treatment Plants

MCES Interceptors

Gravity

Forcemain

Siphon

Community Boundary

Lakes/Rivers

This map illustrates the extensive wastewater collection and treatment network of the Twin Cities Metropolitan Area. It covers Hennepin, Ramsey, Anoka, Washington, Carver, and Scott counties, as well as portions of Dakota and St. Croix counties. The map features a dense network of red lines representing gravity interceptors, green lines for forcemains, and blue lines for siphons. Numerous green triangles indicate the locations of MCES lift stations, while yellow circles mark MCES meters. Black squares denote the locations of various wastewater treatment plants (WWTPs), including the Blue Lake WWTP, Seneca WWTP, Rosemount WWTP, Empire WWTP, and Hastings WWTP. The map also shows community boundaries and major water bodies. A legend in the top left corner provides a key for the symbols used. A scale bar at the bottom indicates distances up to 25 miles, and a north arrow is located in the bottom left corner.
